

`std::false_type`

`std::true_type`

`detail::is_json_iterator
_of< BasicJsonType, typename
BasicJsonType::const_iterator >`

```
graph BT; A["detail::is_json_iterator_of< BasicJsonType, typename BasicJsonType::const_iterator >"] --> B["std::false_type"]; A --> C["std::true_type"];
```

The diagram illustrates a function call. A grey box at the bottom contains the function signature `detail::is_json_iterator_of< BasicJsonType, typename BasicJsonType::const_iterator >`. Two blue arrows originate from the top of this box: one points to a white box labeled `std::false_type` on the left, and the other points to a white box labeled `std::true_type` on the right.
